

PERMEABLE HARDSCAPES

*Please join us for a Lunch and Learn with
D2 Land & Water Resource!*

PROGRAM

This 1-hour lunch and learn presentation will focus on permeable hardscapes for high volume roadways, as well as vegetative green alternatives for low volume vehicle access and soil stabilization. Several project examples will be discussed and details on sustainable materials to implement stormwater infiltration. There will be time for Q & A and discussion on local Low Impact Development Standards.
